

GPSVision™

The Gold Standard in Mobile Mapping and Infrastructure Data Collection

Everything You Can See You Can Map and Efficiently Manage.

- Cost effective, fast turnaround
- Sub meter asset positioning
- Terrestrial imagery randomly accessible
- Much more eye level detail than aerial photography
- Allows for virtual visits and measurement of all assets in your inventory
- Multi-Use
- Data transfers into Asset Management programs such as ICON

Lambda Tech International, a **ZOOM** Partner and sister company, is the developer of **GPSVision™**. The **GPSVision™** system is used to collect digital images along highways and other right-of-ways while traveling at posted speed limits. These georeferenced digital images are used with Lambda Tech's unique Feature Extraction Software to position and measure physical features, such as curb lines, traffic signs, manholes, pedestals and building locations. The georeferenced digital image data and the position and attribute data of the features are stored in a simple format that can be used in standard GIS systems. Once the processed data is loaded into the target GIS, the data is easily displayed in map format, analyzed and/or manipulated utilizing GIS database query functions. A typical client can use this data to accurately position items of infrastructure, develop base maps or view image data directly from an operator's personal workstation in the vehicle or in the office.

The **QUICK** and **AFFORDABLE** Way to Manage Your Assets

- Know what you have
- Plan what you need
- Reduce maintenance costs
- Increase maintenance efficiency
- Meet regulatory requirements
- Reduce your liability
- Share data easily

GPSVision™

Multi-Use Infrastructure Data Collection

Leveraging Image Data for multiple **USES**, multiple **AGENCIES** and multiple **FUNDING SOURCES**

- Asset Management
- Pavement Condition
- Maintenance Pre-Visit
- Homeland Security
- Assessment
- E911
- GASB34
- Traffic Liability Mitigation
- Airport Mapping
- Railroad
- Plant / Utility Inventory
- 3D Virtual Drive
